***JOB DESCRIPTION**

Assurant is the premier provider of specialized insurance products and related services in North America and select worldwide markets. Its four key businesses-Assurant Employee Benefits, Assurant Health, Assurant Solutions and Assurant Specialty Property-have partnered with clients who are leaders in their industries and have established leadership positions in a number of specialty insurance market segments worldwide.

The Sr. IT Auditor II is responsible for understanding and evaluating the internal control and risk environment within Assurant, Inc. Senior IT Auditor II serves as a lead of multiple project teams to assess the organizations information technology (IT) risk and enhance IT business systems, processes, and controls. Projects focus on the assessment and/or evaluation of IT systems and the mitigation of IT-related business risk and the organizations efforts to ensure that IT investments provide maximum security and risk mitigation in the most cost effective manner. Collaborates with the business to analyze, evaluate, and enhance information systems facilitating the business' internal control processes. He or She completes all internal audit work in compliance with established audit methodology while meeting all organizational and professional ethical standards. The incumbent will lead and/or conduct complex engagements and significantly broaden the value, service levels, and capabilities of the Risk and Advisory Services efforts at Assurant, Inc.

Key responsibilities

- Lead the functions around security administration at the network, application, database, and/or server level
- Lead secure web coding practices and standards
- Analyzes highly complex processes to support detailed audit documentation, representative of the current IT control environment
- Continuously assesses opportunities to improve the internal control environment across Assurant, Inc
- Develops and maintains productive team-oriented client and staff relationships through individual contacts and group meetings
- Maintains awareness of significant changes across the organization. and the potential impact on the established control environment
- Pursues professional development opportunities, including external and internal training, and shares information gained with co-workers
- Identifies technology risks and independently evaluates the efficiency and effectiveness of the information technology infrastructure and application controls, including security and internal controls
- Works with audit engagement team to document the business processes that are dependent upon Information Technology

***JOB REQUIREMENTS**

Required skills/experience

- 5 - 8 years relevant business experience, including documentation of business processes, risk and controls identification
- Helpful to speak Spanish
- Ability to work in Visio to create detailed data/process walkthrough documentation
- Some exposure to working with data analytics
